

ReadySet ANALYZE

RS Analyze is our reporting and analytics solution, providing care delivery organizations with increased visibility and actionable information to better manage vendors, personnel and equipment across the surgical supply chain. **RS Analyze** consolidates data from vendors, reps, and your organization to provide insights on physician compliance, product standardization and utilization. Get better control of your surgical supply chain both within and outside of your facility!

Features:

- Delivery and ETA status of surgical trays
- Cases by vendor, surgeon; trays by vendor
- Vendor, surgeon delivery analysis
- Vendor, surgeon lead times
- Customized views by care delivery organization, parent or vendor
- Vendor loaner value, market share
- Compliant vs. non-compliant cases
- Monthly trends
- Views by department: OR, SPD, SCM

Benefits:

- Rapid identification of compliant/non-compliant purchases by employees
- Identify and address vendor and representative performance issues
- More effective planning using supply and demand heat maps
- Utilization trends by vendor, employees
- Facilitate product standardization
- Visibility into supplies and vendors within and outside of your organization
